Environmental room

Hello, when our rules in the environmental room are not always followed by certain people and now that we have received some new residents, we on the board just want to remind you of certain things:

- Cut up the edges and fold your cardboards, the flatter the better, so more will fit in the bins.
- Batteries and light bulbs must not be thrown away in the environment room but may be taken to e.g. sorting area between Ica & Willys at Emporia.
- Styrofoam is thrown away in plastic and large pieces of styrofoam must be divided so more can fit in the bins.
- Food waste that is thrown in the brown bins must **NOT** be thrown in plastic bags, but must be thrown in the brown paper bags that are available, free of charge, by the bins for cardboard.
- **ATTENTION!** If you drop something on the floor or manage to miss the container, please pick it up after you. There is both a broom and a "shovel" beside the door.
- We have also removed 2 newspaper bins and replaced them with 2 bins for plastic waste as we noticed that they were often overflowing.

Garage

In yet another way to make our property safer and prevent unauthorized people from getting into our garage & basement spaces, we have shortened the time before the garage door closes.

Please pay attention to this.

We would also like to remind you that you may **NOT** store things in the garage, e.g. tyres, tools or similar. as this poses a major fire risk and generally looks bad. You are also not allowed to place shopping carts that you cannot bring back or broken chairs that you hope will disappear by themselves.

The board will also order a cleaning of the garage this spring, where the garage needs to be emptied of cars/motorcycles for a couple of hours. We will get back to you with information about the date and time.

The Board
